

Erasmus+ project

BOTS AND ARTIFICIAL INTELLIGENCE

New Materials Available

BAI project responds to the imminent need of European workers, who, regardless of their economic sectors and occupations, will see their work environments transformed in the short-medium term, by the emergence of robotics and artificial intelligence.

CASE STUDIES REPORT

This document collects the results of the research and analysis phase carried out within the framework of the BAI project and aims to offer an approximation to the situation of the **process of incorporating AI and robotics in European companies**, and especially in the participating countries: Poland, Portugal, Italy, Slovenia, Spain and Turkey.

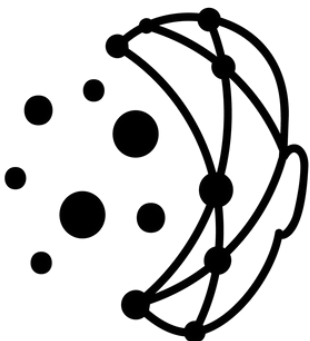

It also introduces specific examples, explained by the protagonists, on **how these incorporation processes have impacted the company and the workers**.

The report is available on the project's website: <https://baiproject.eu/library/>

VIDEO TESTIMONIALS

Workers and company representatives explain how their jobs and/or work environment has been transformed due to the incorporation of artificial intelligence or robotization.

The **video testimonials** are now available on our **YouTube channel**.
